Sir:

AMENDMENT UNDER 37CFR 1.116 AFTER FINAL REJECTION

The following amendments place the above-identified US patent application in better form for consideration upon appeal, and it is therefore respectfully requested that the amendments be entered. This Amendment is accompanied by a notice of appeal. It should be noted that the elements added to the independent method claims correspond to elements previously in claims 10 and 11, and therefore do not add new issues with respect to prosecution of the present patent application. This amendment also is accompanied by a letter to the draftsman with regard to changes to drawings and a revised sheet 1 of the drawings.
